
Tips for Great Color

- Thoroughly loosen soil 6 to 8" deep with shovel, hoe or tiller.
- Spread a 2" layer of Lukas Potting Soil over entire bed.
- Spread 6 to 10 oz. of Fertilome "Start N Grow" over 100 sq. ft. (10 x 10)
- Till in Lukas Potting Soil and "Start N Grow" 3 to 6" deep with a hoe.
- Plant Bedding Plants 12 to 18" apart with rootball 1/4" **higher than ground level.** For mass bed plantings plant "like a 5 on a dice pattern" 🎲. For profuse long lasting color, use Fertilome "Start N Grow" (1 tsp in bottom of hole).

Mulching is **NOT SUGGESTED**

Cut bouquets for the home, or remove faded flowers to extend bloom life.

1st week - irrigate daily
IN MORNING HOURS

2nd week - irrigate every other day

Thereafter - as needed
(avoid soggy soil condition)

LUKAS NURSERY grows only the finest quality bedding plant varieties (as proven at Bedding Plant Assn. Central Florida Field Trials) using a full 4" pot, professional growing medium & time released fertilizer.
