

Delicious foods you'll never have to buy again.

All in beautiful, bountiful, healthful harvest from your own trees and vines and plants.

The miracle keeps happening year after year, because trees and other plantings you can choose now are perpetual food producers, permanent inflation fighters.

And while they're feeding your family and friends with such total savings, they help make your corner of the world a better, prettier place to be, because they are nature's own way to protect and preserve our air, earth, water, sights and sounds with her own growing greenery.

If you have not been enjoying these special economies, the best of all times to begin is now.

Better Foods you'll never have to buy again. Nature's gift.

We'll help you do something about it.

Citrus & Tropical Fruit Tree Planting and Care

- Select site with at least 1/2 day sun, avoiding wet or poorly drained soil areas.
- Clean planting site 4' diameter circle of all grass and vegetation.
- Remove container and surround rootball (soil in original container) with Lukas potting soil.
- Plant fruit tree rootball 1 inch higher than surrounding ground. Planting too deep or piling soil or mulch on top of rootball will smother your tree.
- Water thoroughly twice a week for 3 months, then as needed during periods of no rainfall, but avoid a soggy soil condition, which will kill your tree.

To get your trees off to a rapid start, we urge you to use Fertilome "Start N Grow". You will love the results!

For healthy Good Growth use "Lukas 4 in One" fertilizer 3 times a year in February, June & October.

PROTECT TROPICAL FRUIT TREES DURING PERIODS OF SEVERE COLD
(temperatures below 30° for 5 hours or more)

LUKAS NURSERY'S citrus and tropical fruit trees are the highest quality available, grafted when necessary on superior root stocks and grown in Central Florida for Central Florida conditions of weather & soil types. They are not shipped in from South Florida on inferior rootstocks or poor quality for price compromise!

For additional information call 407-665-5550 and ask for a FREE copy of fruit crops fact sheet for your selection of fruit tree.
